- 1. A trusted gateway system for a proof-of-postage system comprising:
  - a postage meter system;
  - a secure accounting and financial system for providing secure information to the meter;
  - a secure connection between the meter and accounting and financial system providing at least authentication and encryption between the meter and the financial system and accounting; and
  - a user interface, remotely coupled to the meter and adapted to allow a user to access the meter functionality with respect to the accounting and financial system.
- 2. The system of claim 1 wherein the user interface communicates with the meter over a wireless communication pathway.
- 3. The system of claim 1 wherein the user interface comprises a personal digital assistant.
- 4. The system of claim 1 wherein the user interface is securely isolated from the secure connection between the meter and the accounting and financial system.
